# Bathing Beauties

Curvaceous and asymmetric stand-alone tubs are making a splash

→ **CUNA BY AGAPE**

Patricia Urquiola's latest element for Agape is compact and made from thermo-formed acrylic and tubular steel. Available in various materials and finishes. [agape.it](http://agape.it)

↖ **CAPE COD BY DURAVIT**

The natural landscape of the American east coast inspired Philippe Starck's organically shaped tub, which can be equipped with water jets and/or a Bluetooth sound system. [duravit.com](http://duravit.com)

↑↑ **IONIAN BY VICTORIA + ALBERT**

Ideal for bathrooms with a small footprint, Ionian is defined by its tapered edges. It's made from Victoria + Albert's durable, easy-to-clean volcanic limestone composite. [vandabaths.com](http://vandabaths.com)

↓ **WAVE W2 BY WETSTYLE**

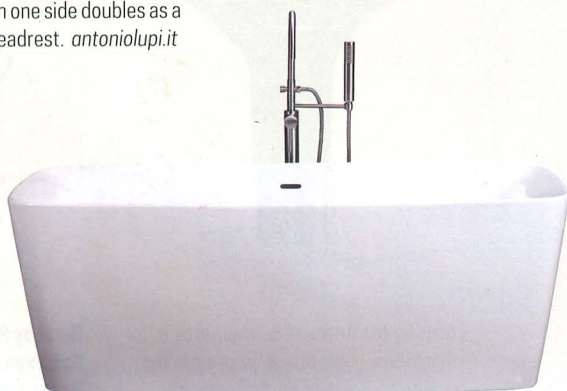

The raised lip of this tub takes cues from the rolling waves of the ocean. It features a hidden overflow channel to the drain, eliminating the need for external plumbing while simplifying installation. [wetstyle.ca](http://wetstyle.ca)

↑ **EMERSON BY KALDEWEI**

German manufacturer Kaldewei called on Arik Levy of Paris to design an asymmetric collection that consists of a bathtub and washstand made of durable, sustainable (and hygienic) steel enamel. [kaldewei.com](http://kaldewei.com)

→ **SUITE BY ANTONIO LUPI**

The slipper-like form of Roberto Lazzeroni's tub, in contrasting Cristalplant, makes it a standout in any bathroom. An elevated edge on one side doubles as a headrest. [antoniolupi.it](http://antoniolupi.it)

→ **LYNDON BY DXV**

This free-standing soaker from American Standard's DXV, made of acrylic with fibreglass reinforcement, suits both classic and contemporary bathrooms. [dxv.com](http://dxv.com)
