The Shadow-Box Mirror, a collaboration between **Gensler** and **Studio El Hospitality**, turns on when it senses movement. As a person moves, the illustration within the glass appears, offering a surprising interactive image. The mirror's interior comprises three layers: a two-way glass first layer; a middle layer of clear acrylic with a printed graphic and Swarovski crystals; and a third layer of acrylic mirror glass.

With a playful and sophisticated aesthetic, Incanter from **Sempli** enhances the flavors of infused beverages. The infusion rod's glass-on-glass construction eliminates the risk of toxic contamination, its lead-free crystal minimizes visual interference, and the use of laboratory grade borosilicate glass avoids weighing down the decanter.

Positioned on a minimalist, sawhorse-shaped base that conceals all plumbing—elements for the water supply and discharge are housed inside the piece—the Dressage Free-Standing Vanity from **GRAFF**, designed by Nespoli and Novara Design Studio, can be equipped with a sink and accompanied by a tray, shelf, towel hook, set of soft-close drawers, and a rectangular mirror that rotates.

→ finalist

WallDrain from **QuickDrain USA** sits flush along the wall for a sleek and unobtrusive look. The patented Sure Flow System eliminates standing water in the drain body, while a sloped trough is designed to remove all the water and debris after each use. The drain cover can be adjusted to the thickness of the wall's ceramic tile or stone covering for a seamless appearance.

QUICKDRAINUSA.COM

“It’s extremely innovative.”

The elliptical silhouette of the Cáscara tub from **MTI Baths** is clean and refined with gently curved sides and an oblique ledge for easy entry and exit. The tub is available as a soaker or air bath with a full range of options including 20 air jets, a heated air blower, a waterproof remote control, and an integrated slotted overflow requiring only a drain installation. MTIBATHS.COM

→ finalist

Soho from **THG-Paris** highlights its contemporary design with clear optical glass in its rose gold finish. Transparent ice cube-shaped handles with refined beveled edges capture the light without distortion, and the glass handle assembly ensures there is no visible hardware or valve stems exposed. The design's widespread faucet complements its tall, slim, and streamlined spout. THGUSA.COM

A countertop cutout forms the bottom of **MTI Baths'** Continuum basin—part of the Boutique collection—creating the illusion of a seamless design where only the top two inches of the rim rests on the counter, allowing a view of the countertop's material through the sink. MTIBATHS.COM
