

## Brushed Finish Doors Now Featuring Fingerprint Resistant Stainless Steel

By applying a microscopically thin clear coat layer to the stainless, the surface is not only resistant to fingerprints but a multitude of other common stains too. The textures in this line include linen, leather grain and all-over diamonds or swirls. Ideal for indoor and outdoor kitchens, designers can create a new kitchen look by changing out the doors. Consumers who appreciate low maintenance will love the ability of all the textures to hide fingerprints.

## What To Look For In Stainless Steel Doors:

*When comparing doors, look for attention to detail. Do the pieces fit together properly?* All of our doors are computer-aided designed and fabricated with computer controlled machines.

*Look at the corners. Are they welded or is there a gap in the corner?* Conventionally welded corners must be ground smooth after welding and then repolished to match the finish of the rest of the door. Matching the finish is expensive and very difficult to consistently achieve. Matching the finish of a textured door is impossible. Our corners are laser welded which eliminates the grinding step and the need to repolish. Every corner is consistent and there is no unsightly mismatch in the finish

*Does the finish vary from door to door?* We have the stainless steel polished to a #4 finish by a company that

specializes in providing appliance grade brushed finish stainless steel. This provides much greater consistency than from the steel manufacturer.

*The back of the door should be stainless steel.* Painted particle board or painted phenolic are poor substitutes for real stainless steel.

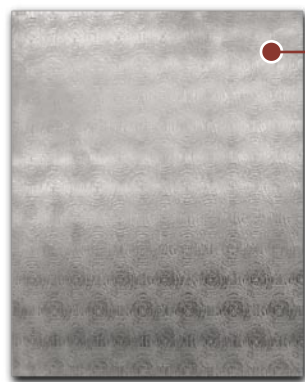

*Check the back for unsightly spot welds, screws or other fasteners.* Our doors are held together internally.

*Make sure there are no sharp or exposed metal edges.* Our doors have rounded, hemmed edges on the back side of the door.

*Can you get the size you want?* All of our doors are built to order to the exact size you need. No additional engineering charges are tacked on.

*Tap the face of the door.* You should not hear a tinny, hollow sound. Tap on our doors and you will hear the difference.

## What makes our doors special? IT'S THE SIDES.

### OUR FRONT SIDE

Choose from a wide selection of textures on our slab door or unique glass designs for our framed glass doors. Not enough choices? We can create your own custom etched design.

### OUR BACK SIDE

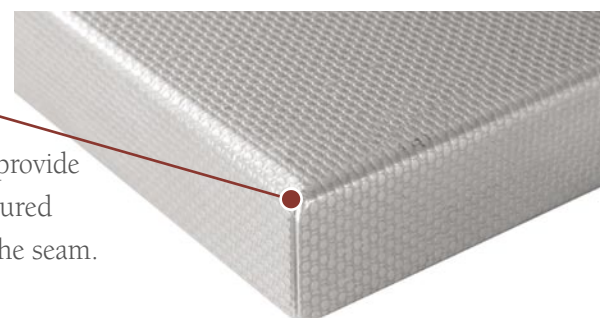

Our stainless steel back is appliance grade brushed finish stainless steel. All edges are rounded with no welds or screws to mar the understated elegance of the door.

### OUR INSIDE

We use an ultra lightweight MDF core to provide a stiff and solid sounding door. You won't hear a hollow sound when you knock on these doors.

### OUR BEST SIDE

Our Best Side is actually our corners. They are laser welded to provide an unblemished corner. The textured pattern is perfect all the way to the seam.

For Kitchens, Baths & Beyond!

Stainless Steel Doors

## A Great Look for Indoors

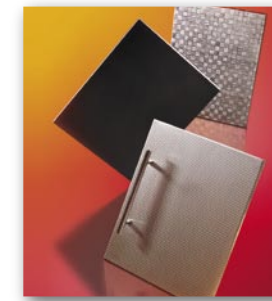

Whether you're looking for a complete stainless steel kitchen or just a few doors to add sparkle to freshen up an existing kitchen, our doors offer the perfect blend of beauty, durability and value. The backs of our doors are as stunning as the fronts. Every door is built to order to the exact size specified. Our glass doors can be ordered with any commercially available glass or you can supply your own and we can install. Textured and mirror polished stainless steel is also available in addition to our standard appliance grade brushed finish. All hinge holes are pre-drilled for 35mm European style hinges. Holes for hardware can be pre-drilled to meet any size specified. Normal delivery for all our doors is just two weeks.

## An Essential for Outdoors

Stainless steel doors aren't just for looks when used outdoors. The stainless steel construction is essential to maintaining the stunning appearance years after you enjoyed the first meal cooked on that new grill. Since our doors are all stainless steel, their appearance won't degrade after prolonged exposure to the elements. Water, temperature extremes, direct sunlight or high humidity have no effect on the appearance or functionality of the doors. These doors are impervious to mildew, fungus, rotting, warping, cracking, and animal droppings. They never need repainting or refinishing. If your outdoor kitchen is near the ocean we can provide marine grade stainless steel. Lasertron also offers a complete line of all stainless steel cabinets to provide a complete solution to your outdoor kitchen needs.

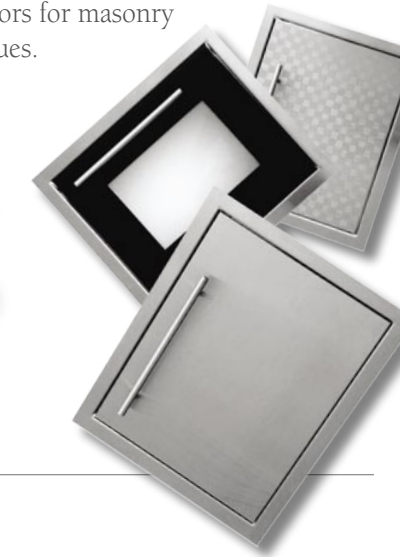

*Pre-hung stainless steel doors for masonry barbecues are available with glass inserts, and a wide array of textures and colors to choose from.*

## Custom Accessories

**DRAWERS AND DOORS**  
Pre-hung stainless steel drawers and doors for masonry barbecues.

**HANDLES**  
Optional stainless steel door pulls. Doors can be pre-drilled to match your hardware selection.

No handle suits your taste? Look at our "no handle" design. Beveled edges eliminate the need for hardware on the front.

## TEXTURES

Choose from our large selection of designer textures. All are available in natural or black.

## COLORS - SPECIAL ORDER

Lasertron's newest introduction - stainless steel with a super hard and durable titanium coating that creates unique colors and extraordinary textural surface interest.

For unlimited color options Lasertron can also paint the stainless with baked on powder coated paint creating a durable and affordable alternative.

## Get Creative

Lasertron offers stainless steel doors which are customizable in almost any way imaginable. Virtually any design is possible to incorporate into our doors. From simple designs as shown at right to complex designs covering several doors to form a mural, we can offer unique capabilities to please any preference.

See-through glass door with diagonal openings.

Slab door with black acrylic insert.
