ability to deliver filtered water two times faster than most conventional drinking water systems. The filtration system also reduces contaminants such as chlorine, mercury and pesticides, helping to fight against the more than 300 chemicals found in tap water throughout the country. With recent headlines of lead contamination in public drinking water sources, it is critical for remodelers, designers and builders to understand consumer options for effective home water filtration.

A Sweet Fit: MTI Baths' New Addison 5 is a Remodeler's Dream

Tight bathroom spaces are often more about embracing function than style. MTI Baths lets you have both with the introduction of their new Addison 5 tub. Comfy and curvaceous, it is simple, minimalist in design, space-conscious and reminiscent of the luxurious spa setting.

Finding a freestanding tub that fits into a standard 60-inch space can be a task. The new Addison 5 comes in at just 58-inches long, yet because it is made of the company's signature ESS® material, the tub walls are only 1" thick. This enables the Addison 5 to offer a very generous interior bathing area with a smaller exterior footprint than a cast iron or acrylic tub with double-walled construction. With elegantly concaved ends that are gently contoured to be supportive and extremely comfortable, the Addison 5 reflects the clean lines that have made the Boutique Collection so popular.

Saniflo Offers New Contemporary China Bowls for Selected Macerating Toilet Systems

SFA Saniflo U.S.A. has unveiled two new, vitreous china, floor-mounted toilet bowls with an updated and contemporary styling, the better to complement modern bathroom design. Available in white with either an elongated or round front, the new bowls are being combined with four current Saniflo macerating plumbing systems: Saniplus, Saniaccess2, Saniaccess3 and Sanibest Pro.
